

**Moriyama Teshima Architects (MTA)** is a team of architects, planners and designers collaborating with clients to build inspiring and enduring spaces that transform communities and reinforce civic identity. The firm offers services in architecture, master planning and urban design, interior design and program development.

MTA's extensive portfolio of Canadian and international projects covers museums and art galleries, university buildings, schools, corporate and government headquarters, community buildings, libraries, restoration and renovation projects, and urban/campus planning. In recent years our firm has focused on sustainable design and particularly on mass timber construction and has grown our portfolio of projects built in collaboration with Canada's Indigenous peoples. With a long-standing core of design traditions that continue to define the practice, our studio is made up of individuals who reflect the cultural diversity that defines our global present: a combination of industry leaders and young designers working together to design and deliver exceptional projects.

Our headquarters are in Toronto, with a second office in Ottawa. This **Junior level Intern Architect** position is based in the **Ottawa office**. While our work is primarily focused in Canada, we also complete significant projects internationally. Learn more about our practice and portfolio at [www.mtarch.com](http://www.mtarch.com).

With this posting we are seeking a **Junior level Intern Architect** with 1+ years of experience to contribute as a vital team member, assisting with all phases of our varied projects. We are looking for a candidate that can demonstrate strong design vision and representational skills and an interest in the technical aspects of design. Scope of work will vary according to the skill level and experience of the candidate, as well as project assignments.

**Qualifications** for this role include:

- B. Arch, M.Arch, or other relevant design degree. Registration with OAA or equivalent regulatory body (as Intern) is an asset.
- 1+ years of relevant experience in a design role is required. Experience in institutional work or other large-scale, complex projects is preferred.
- Experience in multiple (but not necessarily all) phases of architectural design. Phases include concept development and planning, schematic design, design development, and construction documents.
- Competent skills in architectural representation, including but not limited to plans, sections, elevations, 3d models, renderings, and explanatory diagrams.
- Revit skills are required. Proficiency in CAD and other pertinent software including Sketchup, Photoshop, Illustrator, and MS Office are also valuable.
- Foundational knowledge of building materials, specifications, and construction techniques.
- Foundational knowledge of sustainable design approaches.
- Clearance through Contract Security Program is an asset.

**Characteristics** that define a successful member of the MTA team include:

- Self-motivation with strong organizational skills and good problem-solving ability.
- Willingness and ability to take instruction and guidance from senior team members and to contribute individual efforts to broader team objectives.
- Ability to effectively meet deadlines.
- Foundational knowledge of professional ethics applying to the practice of architecture.
- Ability to communicate effectively with coworkers, clients, consultants, and contractors.
- A collaborative attitude and an openness to learning and growth.

**Application** requirements:

- CV detailing education, work experience, technical skills, and OAA Intern (or other relevant professional designation) status.
- A portfolio demonstrating your design and representational skills and experiences.

**Salary** range: To be based on experience level, but a minimum of \$60,000 per annum.
